

# WHAT A BREW CAN DO

**Your support will help make life-saving science and life-changing support happen. Here's what your donation could do:**

**£6**

**could buy 100 microscope slides.**

Breast cancer cells and samples sit on these thin pieces of glass or plastic, so that our scientists can study them under a microscope. This can help them understand what causes healthy cells to turn cancerous.

**£20**

**could keep our forum running for one day.**

Thousands of people affected by breast cancer use our online forum. It's a safe space to share experiences, find information and talk with others. At any hour of the day.

**£30**

**could help someone get answers by calling our free helpline.** No question is too big or small. And all calls are answered by breast care nurses and trained staff.

**“It's been such a help – especially when I was feeling down, scared or isolated.”**
