

# TOUCH YOUR BREASTS LOOK FOR CHANGES CHECK ANY CHANGES WITH YOUR GP

No matter what size or shape your breasts are, **check them regularly.**

Check all parts of your breasts, your armpits and up to your collarbone (upper chest) for **changes.**

Signs and symptoms may appear differently on various skin tones

A **lump or swelling** in the breast, upper chest or armpit

A **change to the skin**, such as puckering or dimpling

A change in the **colour** of the breast – the breast may look darker, red or inflamed

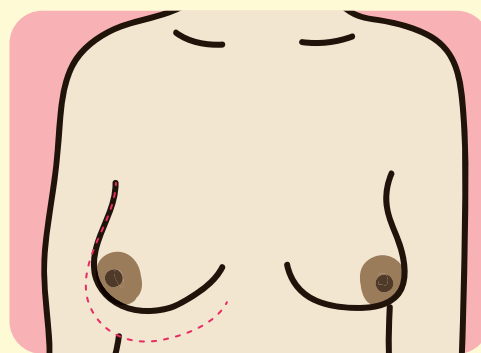

A **nipple change**, for example it has become pulled in (inverted)

**Rash or crusting** around the nipple

**Unusual liquid** (discharge) from either nipple

**Changes in size or shape** of the breast

On its own pain in your breasts is not usually a sign of cancer. But look out for pain in your breast or armpit that's there all or almost all the time.
