It’s not possible to list all the symptoms of secondary breast cancer. Tell your breast care nurse or GP if you have any symptoms that are new, don’t have an obvious cause and don’t go away, such as:

-Unexpected weight loss and a loss of appetite
-Discomfort or swelling under the ribs or across the upper abdomen
-Severe or ongoing headaches
-A dry cough or feeling of breathlessness
-Altered vision or speech
-Feeling sick most of the time
-Loss of balance or any weakness or numbness of the limbs
-Feeling much more tired than usual
-Any lumps or swellings under your arm, breastbone or collarbone
-Pain in your bones, for example in the back, hips or ribs, that doesn’t get better with pain relief and may be worse at night

Talk to your GP or breast care nurse about ANY symptoms that:
- Are new or unusual for you
- Don't have an obvious cause
- Don't go away
