nss.scottishcancernetwork@nhs.scot

WHAT WE ARE LOOKING FOR..

The views from experiences shared will help us develop a Cancer Patient Pathway. This will describe treatment options throughout the cancer patient journey from diagnosis onwards, linking to the useful resources and signposting patients to the existing resources with local initiatives and charities.

We have started this process mapping out the pathway and support for lung cancer, breast cancer and adult brain tumours but we would be happy to hear from anyone affected by cancer as we will be moving on to other tumour sites.

We are asking patients, carers and family members to fill out a short questionnaire telling us about their experience and what they think is important, what worked well and what was missing for them.

If you would like to get even more involved, we will be holding one to one meetings to have targeted discussions. If you have had your diagnosis or have had treatment within the last 5 years, we would be happy to hear from you.
